In the brain, in the cranium, there is the cerebrum, and in the cerebrum, and in particular the claustrum, sitting right there in the middle of the head virtually. From the claustrum there is a secretion, brain fluid, and this fluid is an oil.

In ancient times this fluid was called in Greek **the Christos**, it's called the Christ. It's this beautiful fluid, which comes from the cerebrum, and pours down the spinal cord. It goes down the spinal cord, and it reaches the sacral plexus right next door to the sacrum, which are the 5-second bottom most fused vertebrae bones at the bottom of the spinal column.

1 John 2:27

01:08 mins

The bottom most portion of the spinal column is called the coccyx. Just above that

is the **sacrum**, five fused bones. So the sacral plexus is connected to the sacrum, and the fluid which comes from the cerebrum falls down the spinal cord, and comes to this the bottom most part of the spinal cord. Now, the claustrum is otherwise known as the Holy claustrum simply because of this beautiful oil, this Christos that is produced and secreted.

The word secret comes from secretion because this secretion is a secret, and the sacrum is the sacred part of the secret. As the secretion pours down the spinal cord and reaches the sacrum, this is the marvelous way in which our body has been designed, and the spinal cord is basically just an extension of the brain, and it also does thinking and the holy claustrum is other otherwise known as the Santa Claustrum because this fluid that goes down to the sacred plexus is a sacred fluid, and this is where the story of Santa Claus bringing presents down the chimney comes from. It's a story of physiology, and the Bible is a beautiful manual of **physiological regeneration**.

02:56 mins

What happens with this fluid is that every month when the moon is in the sign where your Sun was when you were born. **Every month there is a germ or a seed planted in the solar plexus**, which is just above the sacred sacral plexus. That germ is the oil, the Christ, which is born in Bethlehem because the sacred sacral, the solar plexus, is otherwise known as Bethlehem where the seed, where the Christ is born, and that seed, that oil needs to return whence it came in the midbrain. You see, the oil ascends the spinal cord the vibration of the oil of the Christ increases, and first of all the oil is differentiated in the pineal gland and the pituitary gland before it is sent down the spinal cord. The pineal gland is the electric portion [male], and the pituitary gland is the magnetic portion [female].

So, the oil is differentiated and it is brought down the spinal cord via the PINGALA and the IDA nerves otherwise known as the Kundalini in the Kunda buffer. **It arrives at the sacral plexus, and awaits for the germinating of the seed once a month**, 12 times a year, and if we are able to transmute that seed, and cause it to rise, as it rises in the spinal cord it eventually reaches the medulla oblongata, and the pons, and the midbrain, and it crosses the vagus nerve otherwise known as the pneumo gastric nerve. It's a nerve which descends from the brain area, from the pineal and pituitary glands respectively, and it feeds the lungs, and the stomach.

05:27 mins

It's a network of nerves, and this network of nerves is called the **Tree of Life**. You see, the ancients knew that this seed that is born in Bethlehem once a month, is the Christ, and that if one were to abstain from sex during that period, that oil and seed would be saved, and it would rise, and it would burst through the heart chakra, through the throat chakra, and eventually the oil would arrive with its higher vibration because at the bottom, the oil has a very low vibratory rate

whereas with proper practices, meditation, breathing, good eating, and good peaceful behavior, one is able to raise that Christ, that oil, so that it crosses the vagus nerve at the top of the spinal column, the 33 vertebrae of the spinal column because the Christ is crucified at 33 years of age. When the oil arrives at the very, very, top there awaiting is the optic thalamus, an egg-shaped organ in the middle of the head. When it crosses this pneumo gastric nerve this is called the crucifixion. **The oil is not killed and destroyed, it is magnified 1,000 fold**, and the oil then touches the optic thalamus, and for 2 1/2 days remains in a condition that is called and dead. That is considered to be dead, and then reaches the pineal gland after 2 1/2 days, and illuminates the optic thalamus and the pineal gland.

The optic thalamus was known as the light of the world by the Egyptians and the Greeks who knew their physiology and anatomy, and they knew this precious oil which descended from the claustrum, from the cerebrum, and was differentiated in the pineal and pituitary glands, and descended the spinal cord, they knew it would ascend eventually, and that the enlightened portion of mankind was able to cause this Christ oil to ascend so that it would ascend to the optic thalamus, and cause it to be lightened. What in turn happens is that **millions of brain cells that were dormant are now awakened**, and there are practices, and there are things that are very, very detrimental to this oil. For instance, overeating, and alcohol and sex practice at the wrong time. These destroy the seed, and this is what is known as eating from the tree of life because the ancients view that once the oil is depleted because of riotous living, the fleshly organism dies, death results from using up all of the oil.

09:20 mins

The oil that descends from the cerebrum is known otherwise as the manna from heaven because heaven means heaved up, and the head, the cranium, the dome which sits on top of the torso that was known as the heavens, and the heart area, and the heart chakra was known as the Midgard or the middle garden, and the generative area was known as Sodom and Gomorrah, the area of desire, animals desire, otherwise known as Egypt, and hell, and the world, etc., whereas the Garden of Eden, and the land flowing with milk and honey that's upstairs. In fact, the pineal gland produces the honey, a secretion known as honey, which has DMT in it, and the pituitary body secretes the milk. This is the milk and honey, and the land flowing with milk and honey is upstairs, and the sacred secret is the secret of this oil, and how to rise the oil, and raise it, so that one is illuminated and opened up to the higher mind. As above so below. This is a sacred secret simply because the secretion, which comes from the sacral plexus is one of the most important things we need to know for physiological regeneration.

11:08 mins

By saving the seed one can actually live longer. In fact, the ancients used to live for thousands of years by protecting and keeping this secret, and guarding it. The Egyptians built ascension chambers, pyramids for this very purpose, and they taught the science of respecting and keeping and guarding and looking after this beautiful oil, and if you know the Gospels well you will know all the scriptures that

are referring to it:

I am the light of the world, he who follows me shall not walk in darkness. The light of the world is the optic thalamus. Keep your eyes simple for if your eyes dark your whole body will be dark. That eye has always been known as the third eye. In fact, it's the spiritual eye. As for the deniers, most church goers will be denying this because in their mind Jesus Christ is a historical person, which must return physically in order to save them because they cannot save themselves. They need a vicarious third-party Savior whereas the opposite is true, and this is what the so-called Apostle Paul was talking about when he referred to the sacred secret of the Christ within, the Christ that dwelleth within, for you see the kingdom of God is within it's not without, and in fact the words of Jesus are pretty clear where it says "Do not be looking out there for the kingdom of God will not come with striking observableness. Don't look here and don't look there because there will be deceivers saying oh there is here is the Christ there is the Christ." because the process is within, and unless one is able to raise that energy, and get out of the bottom chakras.

13:10mins

The bottom chakras deal with sexuality, strife, envy, power, greed, wealth and all of those things, and if one is constantly seeking those things, and constantly eating of the fruit of the tree of life. Those beautiful nerves in the pneumo gastric nervous system, responsible for bringing the oil back up, those beautiful spiritual presence, and we are the ones who are responsible for channeling that oil, that Christ seed within so that it eventually is crucified in the middle of the head. The cerebrum is hollowed out, and the midbrain, and the limbic system at the top of the spinal cord is the Holy of Holies, and the cerebellum, which sits at the back of the brain is otherwise known as the small brain.

The cerebrum is associated with the top of the head Aries, and the cerebellum is associated with Taurus and the left brain, the male left brain. The right brain is the feminine, and it is connected to the cerebrum, Aries the God brain. We have the god man is the cerebrum, the Adam man is the cerebellum. You won't get any of this in church this is esoteric truth. Exoteric truth denies this, and has been perpetuated for the last few thousand years by so-called Christian churches in order to deny and hide the true story of physical regeneration.

15:49 mins

In the past people have lived for thousands of years by preserving and conserving this oil, and transmuting it, so that it reaches the optic thalamus. What happens when the oil reaches the optic thalamus is that new blood is generated in the body. Until such time as this process has occurred we will have old toxic blood in our physical organisms, and in order to regenerate and produce new blood the oil must be raised to the optic thalamus, and healing can occur. As I said before the millions of dormant brain cells are reactivated, and the heavens, the cerebrum were awaiting the return of the prodigal son because we all have these dormant brain cells in our brains. Yes, because they have not returned any of the oil, and in the Bible this is known as tithing. This is why the Bible says you must return one tenth

to the Lord. Remember the Lord, the L 'OR' D refers to gold. This is how we turn lead into gold. Our spinal cord is like a thermometer, and as the mercury rises with warmth, the more so with enlightenment, and consciousness, and knowledge, we are able to raise the condition of this oil, and as it climbs the spine and ascends it raises its vibration.

In fact, when it gets crucified at the top of the spine where the pneumo gastric nerve is crossed, this does not mean death. Crucifixion means to multiply a thousand-fold, and not only is physical regeneration a result of this but also spiritual regeneration, and one is able to experience the higher mind, and clairvoyance. Mediumship occurs down in the solar plexus.

17:28 mins

There are four brains in the human body 1] the cerebrum otherwise known as the God brain 2] the cerebellum which is the man brain 3] the medulla oblongata which is responsible for the involuntary actions in the body such as breathing and blood circulation and 4] the solar plexus which is more related to the animal instinctive brain, which receives images from the ether, from the air just like the animals do, and they react correspondingly without reason and logic, instinctively. **This is why it is so important to raise the oil so that one can get out of the lower mind.** The lower mind is the solar plexus and wrought with problems. You see, ascension is within. One ascends to heaven, the heaved up place, the Dome of the cerebrum. Those two flaps, those hollowed out hemispheres of the cerebrum are otherwise known as the cherubim. In the Bible God says to Moses "You must build the Ark of the Covenant with two cherubim above the Ark, covering over, and inside the ark shall be placed the manner and the law of God the two tablets." Well I'm here to tell you that the optic thalamus is the Ark of the Covenant, and the limbic system, and the midbrain, the pons, the medulla oblongata, the pineal gland, these are the Holy of Holies. This is where one needs to return the good oil, the secret of secrets. This has been known to the ancients, it's in the Bible, in all the legendary books. All of the characters, all of them, they are all in the body.

Colossians 1: 26-29

19:41 mins

In the middle of the head there is something known as the hippocampus. The hippocampus is the little horse. This is the white horse that Jesus rides upon. There is something known as Ammons Horn in the middle of the head. Ammons Horn, would that be in Jesus name Amun the same dude? yeah it would. We have the claustrum. We have the cerebrum. We have the covering angels the cherubim which cover over because the cerebrum covers over the cerebellum, and the midbrain, and the optic thalamus, and the pineal gland, and the pituitary gland, otherwise known as Joseph and Mary.

You see, these two are the ones that are responsible for sending the oil down the spine, down the spinal cord, and they are the ones that await the return of their son who is born in Bethlehem the solar plexus once a month when the moon is in the

Sun sign that you were born under.

This is why astrology is so crucial. Living righteously, over eating, consuming too much alcohol, these are poisons to the oil. These dry up the oil, and once the oil is dried up the human organism dies. It cannot live without the oil. It comes from the cerebrum, this beautiful fluid, the crystalline dew which comes from the heaved-up place, the heaven, and it comes down to the sacrum, the secretion which is the secret, the sacred secret of the Christ within.

I have graphs showing all the body parts that correspond to the Holy Land. The Holy Land is within. The Holy Land is the body, the Jordan River is the spinal cord. Jesus gets baptized at the age of 30, and crucified at the age of 33. These correspond to the bones of the vertebrae, and as we progress with that oil by degree, we get our degrees, we graduate with high honors, and degrees. The degrees refer to the spinal cord, and if we stay in the sacrum, sacred though it is, we do not ever climb Jacob's Ladder to the place which Jacob called pineal.

In Genesis, Jacob laid his head upon a stone. That stone is the five fused bones of the sacrum where the seed is born, and if we are able to wrestle with the angel as Jacob did, and he got a name change to Israel, then we are able to see God face to face because that's what Jacob did when he climbed the ladder, and he called the place Peniel. Interesting, Peniel sounds like pineal, well it is because Jacob says "or I've seen God face to face and I've lived." Jacob 32:20

Folks, please pay heed to this beautiful science of physical regeneration, and spiritual regeneration, raise the Christ, raise the oil, ascend within. For the ones who are looking for ascension in the rapture without are deluded and will be deluded. Thank you for listening. END
